Caio Barilli

Full Stack Developer (PHP/Laravel) · DevOps · Agentic workflows

caiobarilli@gmail.com · linkedin.com/in/caio-barilli · github.com/caiobarilli · caiobarilli.github.io

Based in São Paulo, Brazil (UTC−3) · Remote

Summary

Full stack developer focused on PHP and Laravel. I work from product to infrastructure: interfaces with Livewire and Tailwind, APIs, testing with Pest, and environments with Docker and Terraform on AWS. Day to day, I develop with AI agents in planned rounds, with tests and documented decisions.

Skills

PHP · Laravel · Livewire · MySQL · Redis/Horizon (queues) · REST APIs · Pest · PHPStan · Git · Docker · Terraform · AWS · CI/CD with GitHub Actions · Linux · WordPress

Experience

Full Stack Developer (PHP / Laravel) · KeepCloud 2024 — present · Remote

Built Keeptask, a B2B task and project management platform, with a Laravel web app and a native iOS and Android app.

- Architecture and development of the web app in Laravel 13 with Livewire, Reverb and Horizon, and of the versioned API the app consumes.
- Native iOS and Android app in NativePHP, with offline mode and push notifications.
- About 2,000 automated tests in Pest; integrations with Google Workspace, Zapier and signed webhooks.

Web applications with PHP (Laravel), JavaScript and MySQL; Docker environments for dev and testing; payment gateway and external API integrations; UIs with TailwindCSS, Livewire and Bootstrap; code quality with PHPStan, PHP-CS-Fixer and Pest; reusable Composer packages; Linux/Debian servers; Scrum.

Laravel · PHP · MySQL · Redis · Docker · Livewire · Pest · Linux

Full Stack & DevOps (freelance, recurring projects) · AgroNegociar 2022 — 2025 · Remote

Institutional site and news portal on WordPress (child theme over a community theme, plus custom plugins); AWS environments with Terraform (production and staging); DNS and SSL via Cloudflare; WordOps provisioning; Docker; technical SEO and performance; worked directly with the client and coordinated the design team.

WordPress · PHP · Terraform · AWS · Cloudflare · Docker · WordOps

Earlier experience

Short contracts and freelance work (Layer Up, Zebra Deluxe, Meeta Solutions, QuikDev) · 2021–2022

Full Stack Developer · CTC (formerly Interaktiv) · 2020

Laravel, CakePHP, WordPress, Vue.js and Docker; ran the Scrum daily and planning.

Front-end developer and front-end tech lead · Zebra Deluxe Comunicação · 2019–2020

Full Stack WordPress Developer · 3xceler · 2019

Full Stack Developer · Shape Web · 2018

Front-end developer and front-end tech lead · 123Carros · 2018

Marketplace front end.

Front-end developer (freelance) · WebSide · 2017–2018

Developer and tech lead · Capital Mídia · 2016–2017

Internship · VAD Estúdio Multimídia · 2013

Projects

Keeptask Product at KeepCloud · Active

B2B task, project and workflow platform by KeepCloud: a Laravel web app, a native iOS and Android app and a public documentation site, built end to end with an agentic workflow.

My role: from design and architecture to web and mobile development, the agentic workflow, security rounds and optimizations. Deployment and production operations were handled by the team.

PHP 8.5 · Laravel 13 · Livewire 4 · Reverb · Redis / Horizon · Meilisearch · MySQL · Pest · Larastan · NativePHP Mobile · Docker · Terraform

AWS platform with Terraform Client project · AgroNegociar · Delivered

AWS infrastructure for AgroNegociar's news portal, in production and staging, built from scratch with Terraform.

Terraform · AWS EC2 · EBS · S3 · Cloudflare · WordOps · Bash · WordPress · BuddyPress · bbPress · Elementor · PHP

PHParrot Personal project · In development

Language practice by speaking. Speech is transcribed locally with Whisper, so audio never leaves the machine.

Laravel 13 · PHP 8.5 · Livewire · Whisper (local) · Docker · Terraform · Pest

PHPorto Personal project · Active

A browser panel to manage Windows in one place: WSL commands, Hyper-V VMs, app installs and a local LLM. It runs only on your machine, with token access.

PHP 8.5 · PowerShell · WSL2 · Hyper-V · Ollama · Pest / Pester

Uvalab Personal project · WooCommerce theme · Completed

WooCommerce store built as a Laravel app inside WordPress: a Sage 11 and Acorn theme, screens in Livewire 4 and Flux UI, and a development environment provisioned with Terraform and Docker.

PHP · WordPress / WooCommerce · Sage 11 · Acorn 5 (Laravel) · Livewire 4 · Flux UI · Tailwind CSS 4 · Vite · Pest · PHPStan · Terraform · Docker

Education

MBA, DevOps, Automation & Cloud Strategy · 364 h · FIAP 2025 — 2026

> **Info4All** Group capstone · FIAP MBA · Completed
