Caio Barilli

Full Stack Developer (PHP/Laravel) · DevOps

caiobarilli@gmail.com · linkedin.com/in/caio-barilli · github.com/caiobarilli · caiobarilli.github.io

Based in São Paulo, Brazil (UTC−3) · Remote · English: intermediate · Open to full-time or contractor roles

Summary

Full stack developer focused on PHP and Laravel. I work from product to infrastructure: UIs with Livewire and Tailwind, APIs, testing with Pest, and environments with Docker and Terraform on AWS. Day to day, I work with AI agents in planned iterations, with tests and documented decisions.

Skills

PHP · Laravel · Livewire · MySQL · Redis/Horizon (queues) · REST APIs · Pest · PHPStan · Git · Docker · Terraform · AWS · CI/CD with GitHub Actions · Linux · WordPress

Experience

Full Stack Developer (PHP / Laravel) · KeepCloud 2024 — present · Remote

I develop web applications with PHP (Laravel), JavaScript and MySQL, with Docker environments for development and testing; integrations with payment gateways and external APIs; interfaces with TailwindCSS, Livewire and Bootstrap; code quality with PHPStan, PHP-CS-Fixer and Pest and reusable Composer packages; Linux/Debian servers; Scrum. I built Keeptask, a B2B platform for task, project and workflow management, with a Laravel web app, a native iOS and Android app and a public documentation site, end to end with an agentic workflow.

Full Stack & DevOps (freelance, recurring projects) · AgroNegociar 2022 — 2025 · Remote

I developed the institutional site and the news portal on WordPress (child theme over a community theme, plus custom plugins); AWS environments with Terraform (production and staging); DNS and SSL via Cloudflare; WordOps provisioning; Docker; technical SEO and performance; worked directly with the client and coordinated the design team.

Earlier experience

Short contracts and freelance work (Layer Up, Zebra Deluxe, Meeta Solutions, QuikDev) · 2021–2022

Full Stack Developer · CTC (formerly Interaktiv) · 2020

Front-end developer and front-end tech lead · Zebra Deluxe Comunicação · 2019–2020

Full Stack WordPress Developer · 3xceler · 2019

Full Stack Developer · Shape Web · 2018

Front-end developer and front-end tech lead · 123Carros · 2018

Front-end developer (freelance) · WebSide · 2017–2018

Developer and tech lead · Capital Mídia · 2016–2017

Internship · VAD Estúdio Multimídia · 2013

Projects

AWS platform with Terraform · Client project · AgroNegociar · Delivered

AWS infrastructure for AgroNegociar's news portal, in production and staging, built from scratch with Terraform.

PHParrot · Personal project · In development

Language practice by speaking. Speech is transcribed locally with Whisper, so audio never leaves the machine.

PHPorto · Personal project · Active

A browser panel to manage Windows in one place: WSL commands, Hyper-V VMs, app installs and a local LLM. It runs only on your machine, with token access.

Uvalab · Personal project · WooCommerce theme · Completed

WooCommerce store built as a Laravel app inside WordPress: a Sage 11 and Acorn theme, screens in Livewire 4 and Flux UI, and a development environment provisioned with Terraform and Docker.

Education

MBA in DevOps, Automation & Cloud Strategy · 364 hours · FIAP (Brazilian technology university) · 2025 — 2026

> **Info4All** · Group capstone · FIAP MBA · Completed

Internet Systems Technology degree · Senac (Brazilian technical college) · 2012 — 2015
