Caio Barilli

Full Stack Developer (PHP/Laravel) · DevOps

caiobarilli@gmail.com · linkedin.com/in/caio-barilli · github.com/caiobarilli · caiobarilli.github.io

Based in São Paulo, Brazil (UTC−3) · Remote · English: intermediate · Open to full-time or contractor roles

Summary

Full stack developer focused on PHP and Laravel. I work from product to infrastructure: UIs with Livewire and Tailwind, APIs, testing with Pest, and environments with Docker and Terraform on AWS. Day to day, I work with AI agents in planned iterations, with tests and documented decisions.

Skills

PHP · Laravel · Livewire · MySQL · Redis/Horizon (queues) · REST APIs · Pest · PHPStan · Git · Docker · Terraform · AWS · CI/CD with GitHub Actions · Linux · WordPress

Experience

Full Stack Developer (PHP / Laravel) · KeepCloud 2024 — present · Remote

- Web applications with PHP (Laravel), JavaScript and MySQL.
- Docker environments for development and testing.
- Integrations with payment gateways and external APIs.
- Interfaces with TailwindCSS, Livewire and Bootstrap.
- Code quality with PHPStan, PHP-CS-Fixer and Pest; reusable Composer packages.
- Linux/Debian servers; Scrum.
- Keeptask: a B2B platform for task, project and workflow management, with a Laravel web app, a native iOS and Android app and a public documentation site, built end to end with an agentic workflow.

Laravel · PHP · MySQL · Redis · Docker · Livewire · Pest · Linux

Full Stack & DevOps (freelance, recurring projects) · AgroNegociar 2022 — 2025 · Remote

Institutional site and news portal on WordPress (child theme over a community theme, plus custom plugins); AWS environments with Terraform (production and staging); DNS and SSL via Cloudflare; WordOps provisioning; Docker; technical SEO and performance; worked directly with the client and coordinated the design team.

WordPress · PHP · Terraform · AWS · Cloudflare · Docker · WordOps

Earlier experience

Short contracts and freelance work (Layer Up, Zebra Deluxe, Meeta Solutions, QuikDev) · 2021–2022

WordPress and PHP sites for agencies, Laravel on a FIS Global project, and React/Next.js pages with TypeScript.

Full Stack Developer · CTC (formerly Interaktiv) · 2020

Laravel, CakePHP, WordPress, Vue.js, React and Docker; ran the Scrum daily and planning and handled client tickets.

Front-end developer and front-end tech lead · Zebra Deluxe Comunicação · 2019–2020

Led the front-end team, ran the daily, estimated timelines and took part in hiring; Laravel, WordPress and SASS.

Full Stack WordPress Developer · 3xceler · 2019

Full stack development of two complete WordPress and PHP sites.

Full Stack Developer · Shape Web · 2018

Sites, landing pages and an e-commerce platform in PHP, MySQL and SASS.

Front-end developer and front-end tech lead · 123Carros · 2018

Marketplace front end and WordPress blog, leading the front-end team; Laravel and SASS.

Front-end developer (freelance) · WebSide · 2017–2018

Front end for the agency's sites, landing pages and email marketing.

Developer and tech lead · Capital Mídia · 2016–2017

Hired on permanently and promoted; led the development team, assigned work to external developers and took part in hiring.

Internship · VAD Estúdio Multimídia · 2013

Sites, maintenance and email marketing with HTML, CSS, JavaScript and jQuery.

Projects

AWS platform with Terraform — Client project · AgroNegociar · Delivered

AWS infrastructure for AgroNegociar's news portal, in production and staging, built from scratch with Terraform.

Terraform · AWS EC2 · EBS · S3 · Cloudflare · WordOps · Bash · WordPress · BuddyPress · bbPress · Elementor · PHP

PHParrot — Personal project · In development

Language practice by speaking. Speech is transcribed locally with Whisper, so audio never leaves the machine.

Laravel 13 · PHP 8.5 · Livewire · Whisper (local) · Docker · Terraform · Pest

PHPorto — Personal project · Active

A browser panel to manage Windows in one place: WSL commands, Hyper-V VMs, app installs and a local LLM. It runs only on your machine, with token access.

PHP 8.5 · PowerShell · WSL2 · Hyper-V · Ollama · Pest / Pester

Uvalab — Personal project · WooCommerce theme · Completed

WooCommerce store built as a Laravel app inside WordPress: a Sage 11 and Acorn theme, screens in Livewire 4 and Flux UI, and a development environment provisioned with Terraform and Docker.

PHP · WordPress / WooCommerce · Sage 11 · Acorn 5 (Laravel) · Livewire 4 · Flux UI · Tailwind CSS 4 · Vite · Pest · PHPStan · Terraform · Docker

Education

MBA in DevOps, Automation & Cloud Strategy · 364 hours · FIAP (Brazilian technology university) · **2025 — 2026**

> **Info4All** — Group capstone · FIAP MBA · Completed
>
> Prototype AI agent platform for a challenge set by Contabilizei, a Brazilian accounting startup: ask in Portuguese, get a table, a chart and an explanation, straight from an open-source data lakehouse.

Internet Systems Technology degree · Senac (Brazilian technical college) · **2012 — 2015**

Licenses, certificates and courses

Cloud Computing — AWS Discovery Day · Ka Solution · Sep 2025

Building Quality CRUDs · Hotmart · DevSoutinho · Sep 2023

Advanced Web Development with PHP, Laravel and Vue.js · Udemy · Jun 2022

WordPress Theme Development with WooCommerce · Udemy · Jun 2021
